

Parnassus Endeavor Fund

Second Quarter 2021

Strategy

The Parnassus Endeavor Fund invests with low turnover and high conviction in approximately 30-35 holdings. The Fund focuses on identifying companies with:

- Wide moats or strong competitive advantages that protect market share and profitability
- Quality management teams that will act in the best interest of shareholders
- Compelling intrinsic or relative value opportunities. There will be a range of valuations in this portfolio.

The Fund invests in innovative large capitalization companies with positive workplaces. It offers return patterns that are distinct from overall stock market returns. The focus on innovation and workplace may result in significant exposure to technology companies.

Total Returns (%)¹

As of 6/30/21	3M	YTD	1Y	3Y	5Y	10Y
PARWX	8.01	26.21	74.28	23.22	21.48	17.53
PFPWX	8.05	26.32	74.59	23.51	21.74	17.69
S&P 500 Index	8.55	15.25	40.79	18.67	17.65	14.84

Annual Returns (%)

● PARWX ● PFPWX ● S&P 500 Index

¹All returns greater than one year are annualized.

The Morningstar Rating is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. As of 6/30/21, the Parnassus Endeavor Fund was rated against the following numbers of Large Value Funds over the following time periods: 1,141 funds in the last three years, 1,012 funds in the last five years and 740 funds in the last 10 years. With respect to these Large Value funds, the Parnassus Endeavor Fund - Investor Share class received a Morningstar Rating of 5, 5 and 5 stars for the 3-, 5- and 10-year periods, respectively. The Parnassus Endeavor Fund - Institutional Share Class received a Morningstar rating of 5, 5 and 5 stars for the 3-, 5- and 10-year periods, respectively.

ENVIRONMENTAL, SOCIAL, AND GOVERNANCE GUIDELINES: The Fund evaluates financially material ESG factors as part of the investment decision-making process, considering a range of impacts they may have on future revenues, expenses, assets, liabilities and overall risk. The Fund also utilizes active ownership to encourage more sustainable business policies and practices and greater ESG transparency. Active ownership strategies include proxy voting, dialogue with company management and sponsorship of shareholder resolutions, and public policy advocacy. There is no guarantee that the ESG strategy will be successful.

Performance data quoted represent past performance and are no guarantee of future returns. Current performance may be lower or higher than the performance data quoted, and most recent month-end and quarter-end performance is available on the Parnassus website, www.parnassus.com. Investment return and principal will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original principal cost.

²Percent based on total net assets as of 6/30/21.

Average Weighted Market Cap is the average capitalization of all stocks in the portfolio, weighted by each holding's size in the portfolio. **Price/Earnings (P/E) Ratio** is a ratio of a stock's current price to its per-share earnings over the past 12 months. **Price/Book (P/B) Ratio** is the ratio of a stock's latest closing price divided by its book value per share. **Alpha** is a measure of performance on a risk-adjusted basis. Alpha takes the volatility (price risk) of a mutual fund and compares its risk-adjusted performance to a benchmark index. The excess return of the fund relative to the return of the benchmark index is a fund's alpha.

Beta is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole. A beta over 1.00 suggests that the share price will typically be more volatile than the market. **R-Squared** is a measurement of how closely the portfolio's performance correlates with the performance of a benchmark index such as the S&P 500 Index. **Standard Deviation** is a calculation used to measure the variability (risk) of a portfolio's performance. **Sharpe Ratio** is a ratio used to measure risk-adjusted performance. It is calculated by subtracting the risk-free rate from the rate of return for a portfolio and dividing the result by the standard deviation of the portfolio returns. **Active Share** measures the percentage amount your portfolio differs from a passive benchmark.

Risks: The Fund's share price may change daily based on the value of its security holdings. Stock markets can be volatile, and stock values fluctuate in response to the asset levels of individual companies and in response to general U.S. and international market and economic conditions. In addition to large-cap companies, the Fund may invest in small- and/or mid-cap companies, which can be more volatile than large-cap firms. Security holdings in the fund can vary significantly from broad market indexes. The Standard & Poor's 500 Composite Stock Price Index (the S&P 500 Index) is a widely recognized indexes of common stock prices. An individual cannot invest directly in an index. An index reflects no deductions for fees, expenses or taxes. Returns shown for the fund do not reflect the declaration of taxes a shareholder would pay on the fund distributions or the redemption of fund shares.

The **Morningstar Rating™** for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

The **Morningstar® Sustainability Rating** is a measure of how well the portfolio holdings are managing their ESG Risk relative to the portfolio's Global Category peer group. The Morningstar Historical Sustainability Score is a weighted average of the trailing 12 months of Morningstar Portfolio Sustainability Scores. More-recent portfolios are weighted more heavily than older portfolios. Based on their Morningstar Historical Sustainability Score, funds are assigned absolute category and percent ranks within their Morningstar Global Categories. Higher ratings are better and indicate that a fund has, on average, more of its assets invested in companies that have lower ESG risk as characterized by Sustainalytics. The Morningstar Sustainability Rating is depicted by globe icons where High equals 5 globes and Low equals 1 globe. Morningstar updates its Sustainability Ratings monthly and uses Sustainalytics' ESG scores from the same month as the portfolio as-of-date.
